

## Placement Requirements

- Machine must be level.
- Countertop able to support the machine's weight.
- Counter area able to accommodate machine's footprint (refer to manual).
- Level installation surface, brewer level on the surface.

## Water Treatment

- Sediment filtration installed.
- Chlorine filtration installed.
- Water lines flushed prior to hook-up.

## Water Supply

- 1/4" flare water connection (1/4" flare male fitting included).
- Dedicated supply line to the machine from the wall.
- Dedicated water shut off valve within close proximity to the machine.
- Dynamic water pressure between 20-90psi, above 90psi install a pressure reducer to 50psi.
- Water supply from the location's cold water circuit.
- No leaks at any connection point.

## Electrical

- Power cord minimum of 3 feet maximum of 6 feet, measured strain relief to plug.
- For 120VAC: dedicated 15AMP circuit breaker with 15AMP rated receptacle and plug.
- Power cord routed and secured without stress or wear points.
- Power cord plugged completely into the receptacle.
