

AutoPOD™ Coffee Brewing Process

Step 1: Home screen will display a total of three messages.

**AutoPod Brewer
Ready To Brew**

**Place Cup
To Begin**

**Press Open
To Load Pod**

Step 2: Place cup under brew chamber onto booster tray or drip tray. The booster tray will allow up to 5 inch cup clearance or bottom drip tray up to 8 inch cup clearance.

Step 3: Press the Open/Close switch to open the pod door and press a coffee pod firmly down into the pod holder. Menu screens will prompt you through the process. The pod holder will accommodate a variety of pods and different sizes from 50 to 61mm wide.

**PLEASE WAIT
DOOR OPENING**

**PRESS POD
IN DRAWER**

Step 4: Press the Open/Door switch to close the pod door. Menu screens will prompt you through closing the door and selecting brew size.

**PLEASE WAIT
DOOR CLOSING**

SELECT BREW
↓ ↓

Step 5: After selecting brew, the menu screens will scroll brewing messages during the brew process and inform you when brewing is complete. The system will automatically dispense the pod into the pod bin, reset back to standby position and be ready for next brew command.

**PLEASE WAIT
PRE-INFUSION**

**BREWING
PLEASE WAIT**

**BREWING
COMPLETE**
