CONTENTS

20201.1601	1	90° Elbow, Tin Plated .375 Barb
12422.0001	2	Clamp, Hose-Snap Type
20976.0066	1	Tube, Silicone .38ID x 48L
01317.0006	4	Screw, Trh Sltd Blk
00970.0000	4	Nut, Keps #8-32 Zinc Plated
38443.0000	1	Spacer, Hot Water Box
34373.0003	1	Dispense Assy, HW Side Mt.
38762.0000	1	Instructions, HW Dispense Kit
38849.0000	1	Template

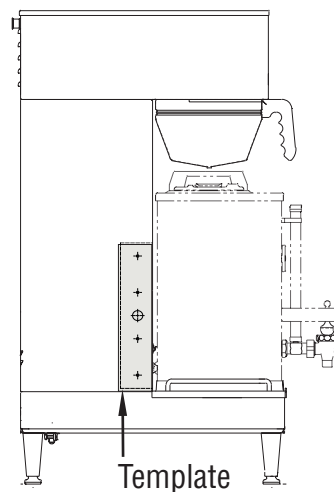

INSTRUCTIONS

1. Turn off the water to the unit.
2. To drain the tank, run brew cycles without coffee grounds until no more water comes out.
3. Disconnect the unit from the power supply. Allow the remaining water in the tank to cool.

WARNING: The tank should be drained, and the unit disconnected from the power supply before removing any panels. Any water remaining in the tank should be allowed to cool before proceeding to the next step.

4. Remove the top cover and front access panel.
5. After allowing sufficient time for the water to cool, carefully remove the plug from the center output in the tank and install the 90° Elbow #20201.1601 with the barb pointing straight down.
6. Attach the provided template #38849.0000 to the side of the unit as shown in Fig. 1. Drill 5 holes as indicated by the template - 4 holes 3/16" diameter, 1 hole 3/4" diameter.
7. Remove the template and deburr all holes.
8. Attach the Hot Water Box and Spacer according to instruction sheet #34372.0001.
9. Attach the #20976.0036 Tube to the tank and faucet adaptor in the Hot Water Box using the #12422.0001 Clamps.
